## Tested Sample/Part Description

- (1) Transparent resin
- (2) PCB(Tested as a whole)<sup>#1</sup>

**Remark:** The sample(s) had been dissolved totally tested for Lead, Cadmium, Mercury.

-MDL = Method Detection Limit

-N.D. = Not Detected (<MDL)

-mg/kg = ppm = parts per million

-<sup>①</sup>: In view of the substances are established as UVCB substances (substances of unknown or variable composition, complex reaction products or biological materials) consisting of different and variable constituents, the test results are calculated based on the main constituents of the representative compounds for substances.

-\* Calculated result of Diantimony trioxide is based on the result of Antimony (Sb).

The MDL is evaluated for element Antimony(Sb).

-<sup>#1</sup>The sample(s) was tested as a whole, because it's impossible to disassemble or separate it by current equipment and technology. The result(s) shown on this report may be different from the content of any homogeneous material.

**Note:** -The testing data and result(s) in this report is(are) just for scientific research, education, internal quality control and product development etc.
