Tested Sample/Part Description

- (1) Mixed test, metal with golden/silver-white plating, metal with light golden/silver-white plating and metal with silver-white plating^{#1}
- (2) Purple resin
- (3) Black plastic

Remark: The sample(s) had been dissolved totally tested for Lead, Cadmium, Mercury.

-MDL = Method Detection Limit

-N.D. = Not Detected (<MDL or LOQ)

-mg/kg = ppm = parts per million

-LOQ = Limit of Quantification, The LOQ of Hexavalent chromium is 0.10 µg/cm²

-[▼]The sample is negative for Cr(VI) – The Cr(VI) concentration is below 0.10 µg/cm². The coating is considered a non-Cr(VI) based coating.

-^①: In view of the substances are established as UVCB substances (substances of unknown or variable composition, complex reaction products or biological materials) consisting of different and variable constituents, the test results are calculated based on the main constituents of the representative compounds for substances.

-* Calculated result of Diantimony trioxide is based on the result of Antimony (Sb).

The MDL is evaluated for element Antimony(Sb).

-^{#1}As specified by client, the test was conducted by mixing several samples together. The result(s) shown on this report may be different from the content of any homogeneous material.

Note: -The testing data and result(s) in this report is(are) just for scientific research, education, internal quality control and product development etc.
