

ezyLED 12V AC 3030 EMC AB-EZP Series

ezyLED reduces driving circuit dramatically. All ezyLEDs are connected in parallel, and directly driven by a conventional 12V AC/DC voltage source without the needs of the driver IC and passive components. With ezyLED so easy to use, users only have to focus on the design of the lamps. Inventory management of components is minimized.

AB-EZP products operate over a wide voltage range (Figure 3). Luminous intensity remains constant for $10.4V < V_{in} < 24V$, and maintains approximately 50% of its nominal value when input voltage drops to 9 volts.

AB-EZP products support over temperature protection (OTP) by reducing input current and hence the luminous intensity when the device temperature exceeds $120^{\circ}C$ (Figure 2). For long-term reliability, sufficient heat dissipation mechanism in lamp design is required to ensure ezyLED operates in the rated temperature range ($-40^{\circ}C \sim 85^{\circ}C$).

Features

- Patented LED chip design with built-in driving IC
- Using conventional 12V AC/DC voltage sources
- All ezyLEDs connected in parallel
- Luminance and Correlated color temperature (CCT) remain constant while the input voltage varies over an extensive range
- Built-in rectification for non-polar applications
- Over temperature protection

Application

- Automotive lighting
- Architectural lighting
- General lighting
- Down light
- Landscape lighting

General Characteristics (Ta=25°C @ Vin =12V)

Parameters	Symbol	Min.	Typ.	Max.	Unit
Luminous Flux@20mA (0.3W)	Φ_v		30		lm
Luminous Flux@50mA (0.5W)	Φ_v		60		lm
Luminous Flux@100mA (1.0W)	Φ_v		110		lm
Luminous Flux@110mA (Red)	Φ_v	39	42	44	lm
Luminous Flux@110mA (Green)	Φ_v	71	75	79	lm
Luminous Flux@110mA (Blue)	Φ_v	25	26	27	lm
Viewing Angle (FWHM)	$2\theta_{1/2}$		120		degree
Thermal Resistance (Junction to slug)	R_{th}		15		°C/W

Absolute Maximum Ratings

Parameters	Symbol	Min.	Typ.	Max.	Unit
Rated Voltage	Vin	10.5	12	24	Vdc
Reverse Voltage				15	Vdc
LED Junction Temperature	T _J			120	°C
Operation Temperature Range	T _c	-40		85	°C
ESD@HBM	ESDHBM			4K	V
Allowable Reflow cycles	-			3	cycles
Storage Temperature Range	-	-40		100	°C

Notes :

Parts are tested in pulsed conditions, T_a=25°C.

Pulse width is 10ms at rated voltage.

Tolerance of Luminous Intensity: ±10%

Maximum Temperature at solder pads (T_c) during operation: 85°C

The lifetime will be decreased if the operation temperature exceeds the maximum value.

A Lighting Blue LED

Figure 12 Soldering Condition (Reference: IPC/JEDEC J-STD-020C)

ezyLED ZE1C series are compatible with IPC/JEDEC J-STD-020C, following the parameters listed below. Recommends that users follow the recommended soldering profile as the general guideline.

Profile Feature	Pb-Free Assembly
Average ramp-up rate (TL to TP)	3°C/second max.
Preheat	
Temperature Min (Tsmmin)	150°C
Temperature Max (Tsmmax)	200°C
Time (min to max) (ts)	60-180 seconds
Time maintained above:	
Temperature (TL)	217°C
Time (tL)	60-150 seconds
Peak/Classification Temperature (Tp)	240°C
Time within 5°C of actual Peak Temperature (tp)	20-40 seconds
Ramp-down Rate	6°C/second max.
Time 25°C to Peak Temperature	8 minutes max.
